

# Natural Language Processing Bootcamp

- There are a few key steps for working with Spacy that we will cover in this lecture:
  - Loading the Language Library
  - Building a Pipeline Object
  - Using Tokens
  - Parts-of-Speech Tagging
  - Understanding Token Attributes

# Natural Language Processing Bootcamp

- The **nlp()** function from Spacy automatically takes raw text and performs a series of operations to tag, parse, and describe the text data.
